

EXPERIENCE

Senior Product Designer

JPMorgan Chase

January 2024 – Present | Palo Alto, California

- Led end-to-end lending experience for a B2B SaaS Digital Commercial Banking platform designing Lending dashboards, data visualizations, and core workflows. Collaborated across work streams to ship from concept to delivery.
- Established component library and contributed reusable components to the design system, driving adoption across work streams. Partnered closely with engineering, design system, and content teams to ensure consistency cross-platform.
- Defined product vision for AI Data Vision, an agentic AI tool that lets users upload Excel sheets, visualize data, and surface key insights from complex documents through natural conversation. Designed data visualizations and a RAG system to reduce information overload. Received support for potential patent award. (R&D initiative)
- AI Enablement Across Design Teams, Developed Agentic Thinking framework and facilitated workshops for 300+ practitioners to integrate AI into their workflows.

Senior Product Designer

Citi Bank

April 2021 – January 2024 | California

- Redesigned the balance transfer experience across mobile and web, improving end-to-end UX workflows for Citi's 20 million users, built reusable components aligned with Citi's design system and launched a native iOS experience with App Clip integration, following Apple's Human Interface Guidelines
- Improved onboarding experience for small business account opening at Citibank, leading design of application portals for small business and credit cards, delivering wireframes, prototypes, and production designs in collaboration with cross-functional teams
- Defined design vision and AI integration strategy for Citi's mobile product ecosystem, conceptualizing an AI Insights experience with potential to unlock \$80M in additional revenue, presented to Citi Design leadership

Founding Product Designer

Toca Football

August 2020 – January 2021 | Costa Mesa | California

- Led the product design of the My Toca mobile app and web application. Developed a gamification strategy to enhance player experience

Lead Product Designer

Please Assist Me Inc

April 2019 – August 2019 | Philadelphia

- Conducted UX research, developed the product roadmap, designed iOS and Android UI, prototyped solutions, and collaborated closely with the CEO

Product Designer

Thomas Jefferson Dice Group

December 2018 – May 2020 | Philadelphia

- Designed VR experiences for healthcare education.
- Consulted various startups through Blackstone Launchpad Jefferson

Skills

- Product Design
- Design Systems
- Prototyping with Code
- iOS Design & Android Design
- Human Interface Guidelines
- Material Design Guidelines
- Motion & Interaction Design
- Userflow & Wire-framing
- AI Agents Integration
- Product Strategy
- UX Research
- UX Design
- UI Design
- Prototyping with AI
- Vibe coding
- UX Strategy

Tools

- Figma, FigJam, Cursor, Sketch,
- Vscode, Claude Code, GitHub,
- ProtoPie, Jitter, Play, Figma Make,
- Lovable, n8n, Xcode, Notebook LM

Code

- HTML, CSS, JavaScript, SwiftUI,
- React, TailwindCSS

Awards

- Won Hackathon hosted by OpenAI,
- Lovable, AGI Inc, developed and prototyped UX Agent in 48 hours

Publication

- Created AI Design Playbook, a Substack publication exploring emerging AI trends read by 2,500+ designers and leaders from Apple, Google, Adobe, and Stanford
